The Department of Electrical & Computer Engineering was established in 1996 and has formed a key part of the college since its inception. Our programmes prepare students for industry, government and graduate studies in specialised fields of electrical power, telecommunication, electronic and instrumentation and computer engineering. We offer four BEng programmes, all of which offer an opportunity for internship in industry during the course of study.
Hear it from our Alumni:
Farhan Mahmood Al-Farsi
Currently working in Ministry of Defence

“CCE always encourages students to take up responsibilities and take part in many activities without neglecting the educational and academic part and in turn also rewards the achievers. This is somewhat of the same philosophy used in MoD where I’m proud to work.”
