The Student Council of Caledonian College of Engineering (SCCCE) is a student-elected group that represents the student body. Inaugurated in December 2009, the Student Council offers a mechanism for identifying, discussing, and solving student-related issues as well as involving students in the wider community. The Council provides a platform for expressing students’ views, talents and abilities and thereby provides an enriching experience in the college. The members of the council are professionally accountable for building, sustaining and integrating a strong and functional engineering community that works in partnership with college management and staff, as well as with parents, for the benefit of all students.

Campus Life

We have a very active body of students who run events and activities, with the help of CSSS, throughout the year. These events include Charity Fair, National Day Celebrations, College Day, Blood Donation, Students Fun Day, sports tournaments and student awareness campaigns.
Heritage & Culture
The Sultanate of Oman is a country rich in heritage and steeped in tradition. At Caledonian College of Engineering, we believe in the importance of enhancing a student’s awareness of Omani culture and emphasizing the acquisition of related social skills and maintain the Department of Heritage & Culture for this purpose.

Activities of the Department of Heritage & Culture:
- Creating awareness among our students of Oman’s’ heritage, culture and traditions
- Fostering your leadership skills in developing local cultural activities
- Supporting you in being more open to different cultures and civilisations
- Enhancing the culture of tolerance and peace
- Raising awareness of Islamic achievements in the field of science
- Conserving the traditions and values inherited from previous generations
- Developing your abilities to invent modern and traditional cultural products
- Linking modern technologies with ancient and historical engineering practices.

Heritage & Cultural Events
We encourage you to participate in various cultural, traditional and entertainment activities which will enrich your experience in the college and equip you well to become a cultured graduate and play a responsible role as a valued member of your community.

Activities and Sports
Life at Caledonian is not only about books, learning and exams. Participation in non-academic activities will help you to improve your leadership skills, teamwork, and ability to meet and overcome challenges and above all inculcates in you the spirit of sportsmanship. All these are skills you will need in your day to day life especially when you move out into the world of work. With this in view ample opportunities are available to polish your skills. CCE takes pride in developing these aspects of a student’s personality through a wide range of extracurricular activities that include creative activities, recreational events, sports clubs and societies. All Students are encouraged to be a member of an existing club or society or to take their own initiative within and outside the campus. Social and recreational activities have been introduced to increase the participation of students in community services to build a better society and make students aware of their responsibility to the community as a whole.

Caledonian Centre for Creativity and Innovation (CCCI)
At CCE we encourage student initiative and enterprise. Our unique Centre of Creativity and Innovation nurtures the spirit of entrepreneurship among talented and ambitious students, providing a technology link between the college and commerce and industry in Oman. Various exciting projects supported by this centre include the building of an eco-friendly, energy-efficient car for participation in the Shell Eco-Marathon Competition to be held in February 2015. The team builds on the success of Team Oryx – a team of CCE students so passionate about cars they built their own, and in the process became the first team in Oman and the Gulf to participate in the annual international formula racing event at Silverstone in UK in 2013. Future students at CCE have the chance to build on this legacy or indeed to receive the technical and practical support of the centre in any creative project that has extracurricular or potential commercial value.
